DETAILED ACTION

Response to Amendment

This action is in response to Applicant's amendment filed June 19, 2006. Claims 1-72 are pending in the present application. No claim has been amended.

Election/Restrictions

- 1. In view of Applicant's argument dated June 19, 2006, restriction to one of the following invention is required under 35 U.S.C 121:
 - A. Claims 1-47 and 67-72 are drawn to a method and medium for configuring a plurality of software components of an intelligent device, classified in class 709, subclass 220.
 - B. Claims 48-72 are drawn to the intelligent device itself, classified in class 709, subclass 201.
- 2. Inventions A is related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention A has separate utility such as a method and medium for configuring a plurality of software components of an intelligent device, classified in a different Class/Subclass. Invention B has a separate utility such as an intelligent device itself, classified in a different Class/Subclass. See MPEP 806.05(d).
- 3. The inventions are distinct, each from the other because of the following reasons:

Art Unit: 2143

- (a) these inventions have acquired a separate status in the art as shown by their difference classifications.
- (b) the search required for each Group is different and not co-extensive for examination purposes.

For example, the searches for the two inventions would not be the co-extensive because these Groups would require different searches on PTO's classification class and subclass as following:

The Group A search (1-47 and 67-72) would require use of search class 709, subclass 220 (not required for the invention B).

The Group B search (claims 48-72) would require use of search class 709, subclass 201 (not required for the invention A).

For the reasons above restriction for examination purposes as indicated is proper.

- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
- 5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17 (h).

Art Unit: 2143

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alina N. Boutah whose telephone number is 571-272-3908. The examiner can normally be reached on Monday-Friday (9:00 am - 5:00 pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David A. Wiley can be reached on 571-272-3923. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
